

STAFF USE OF INFORMATION AND COMMUNICATION TECHNOLOGY POLICY

RATIONALE

Information and Communication Technology (ICT) has been introduced into schools allowing access to email and the Internet and other telecommunication devices. The availability of such resources provides the opportunity for schools to help students develop their full potential. ICT provides significant educational value but can pose a risk of exposure to inappropriate and offensive material and personal safety.

In accordance with the teachings of the Catholic Church, the practice of communication must be totally honest and reflect the highest standard of accountability and sensitivity to human rights and relationships.
